ETIQUETTE ENGINEERING

ONE PARTNER - EVERY SOLUTION

COMPANY PROFILE

ETIQUETTE ENGINEERING

ONE PARTNER - EVERY SOLUTION

OUR VISION

To become a leading and trusted Namibian provider of integrated engineering, construction, ICT, logistics, trading and supply solutions across regional and international markets.

OUR MISSION

To deliver reliable, innovative and cost-effective solutions through professional expertise, quality service and strategic partnerships that create lasting value for our clients.

OUR CORE VALUES

Integrity: Upholding honesty, transparency and accountability.

Excellence: Delivering quality and professional service.

Innovation: Embracing technology and better ways of working.

Reliability: Keeping our commitments and delivering on time.

Customer Focus: Prioritising client needs and satisfaction.

Safety & Sustainability: Promoting responsible and safe business practices.

WHO WE ARE

Etiquette Engineering is a fully Namibian-owned and established firm founded in 2014, providing integrated engineering, construction, procurement, trading, logistics and technology solutions to businesses, institutions and industrial clients. Our diversified service portfolio enables us to meet a broad range of client requirements through a single, reliable and solutions-driven partner.

Our expertise spans engineering design, architectural drawings, quantity surveying, Bills of Quantities (BOQs), project planning, cost management and construction, offering clients a comprehensive, turnkey approach from concept development and technical design to procurement, execution and project handover. Beyond the built environment, we are actively engaged in import and export, commodity trading, logistics, ICT services, general supply and delivery, and the provision of engineering-related products and solutions.

We recognise the growing opportunities within Namibia's energy, oil and gas, mining, industrial and infrastructure sectors. As these industries continue to attract investment and international participation, Etiquette Engineering is strategically positioned to support the needs of local and international companies through integrated service delivery, supply chain support, technical expertise and reliable procurement solutions. Our diversified business model allows us to respond to varying project demands, from supplying essential goods and equipment to coordinating logistics, delivering technology solutions and supporting engineering and construction projects.

Guided by professionalism, integrity, quality, efficiency and a commitment to client satisfaction. We believe in building long-term business relationships through dependable service, competitive solutions, responsible business practices and a clear understanding of our clients' operational requirements.

Etiquette ENGINEERING
One Partner - Every Solution.

OUR SERVICES

OUR COMMITMENT

We are committed to delivering reliable, cost-effective and integrated solutions across multiple industries. Through our diverse service offering and client-focused approach, we strive to simplify complex requirements and build lasting business partnerships.

Construction, property development & infrastructure solutions

We provide integrated engineering, construction, property development and infrastructure solutions to government institutions, private developers, mining companies, commercial enterprises and industrial clients.

Engineering & Construction Services

Our services include civil engineering, residential, commercial and industrial construction, mining infrastructure, roads, earthworks, site development, project management, renovations, infrastructure upgrades and turnkey design-and-build solutions.

Property Development & Real Estate Investment

We engage in property acquisition, development, investment and asset ownership, focusing on commercially viable opportunities that generate sustainable returns and contribute to long-term business growth.

Through our integrated approach, we combine construction expertise with property investment to deliver infrastructure, develop real estate assets and create lasting economic value.

Architecture & Building Design

We offer architectural drawings, building plans, concept development and space planning for residential, commercial and industrial developments, combining functionality, aesthetics and practicality.

Import & Export

We facilitate international trade through product sourcing, import and export coordination, trade documentation support and cross-border supply arrangements, connecting clients with local and international markets.

Commodity Trading

We facilitate the sourcing and trading of commodities, connecting buyers and suppliers while coordinating commercial transactions and the supply of goods in accordance with client requirements.

Logistics Services

We provide logistics and supply chain coordination, including transportation, freight, distribution and delivery arrangements to support the efficient movement of goods, equipment and materials.

General Supplies & Procurement

We source and supply equipment, materials, tools, consumables and other business requirements, providing tailored procurement solutions to corporate, government, construction and industrial clients.

ICT Services

We are a specialised ICT systems integration and engineering technology solutions provider. We focus on designing, implementing and maintaining technology systems for the engineering, mining, industrial and infrastructure sectors.

Our approach combines systems integration, network infrastructure, industrial technology and technical support to improve operational efficiency, automation, safety, connectivity and overall business performance.

Quantity Surveying

We provide Bills of Quantities (BOQs), cost estimates, budgeting, tender documentation and cost management services to promote financial efficiency and effective project planning.

Oil, Gas & Industrial Services

We support the energy, oil and gas, mining and industrial sectors through equipment sourcing, materials supply, procurement coordination and related technical and project support services.

Project & Procurement Support

We coordinate suppliers, materials, procurement activities and project requirements to streamline operations, improve resource planning and support the timely delivery of projects.
